PROJECTS

Research Management System Website (Web Application)
- Backend Developer   - HTML
- Frontend Developer   - CSS
- 2023   - JavaScript
                           - PHP
                           - SQL

I managed the CRUD functionalities for a web-based project at BatStateU, which involved compiling a catalog of intellectual property assets and research undertakings accessible via online publishing platforms such as IEEE and Google Scholar. My substantial contributions to the project included enhancing the user experience (UX) through the application of HTML, CSS, and JavaScript.

ATLANTIS: An IoT-Based Artificial Intelligence Aquaponic Control andMonitoring System for Aquaponics Greenhouse (Mobile Application)
- Backend Developer   - Django
- 2023   - React Native (Minimal)

Collaborated in retrieving information from an API using Django framework to display in a mobile-based project of BatStateU that utilizes mobile technology to track the condition of plants, fish, as well as air and water quality through a mobile device.

Aidukasyon: An Educational Assistance Web Portal (Web Application)
- Backend Developer   - HTML
- Frontend Developer   - CSS
- 2022   - JavaScript
                           - PHP
                           - SQL

I was responsible for the development of CRUD functionalities and played a pivotal role in the front-end development of some admin side pages of the website. This project aimed to facilitate online submission of educational assistance requirements and document management for the Municipality of Alitagtag. I used PHP and SQL for the backend and HTML, CSS, and JavaScript for the frontend, resulting in a seamless and user-friendly admin interface.
