PROJECTS

Research Management System Website (Web Application)
- Backend Developer
- Frontend Developer
- 2023

- HTML
- CSS
- JavaScript
- PHP
- SQL

In the development of the admin side of the website responsible for managing publications and IP assets at Batangas State University, I served as a backend developer and played a central role in implementing the CRUD functionalities. While my main focus was on backend development, I also made some minor contributions to the UX development.

ATLANTIS: An IoT-Based Artificial Intelligence Aquaponic Control andMonitoring System for Aquaponics Greenhouse (Mobile Application)
- Backend Developer
- 2023

- Django
- React Native (Minimal)

I collaborated on a mobile-based project at Batangas State University that utilized Django framework to fetch data from an API. This data was then displayed on a mobile device, allowing users to monitor the condition of plants, fish, and the quality of air and water.

Aidukasyon: An Educational Assistance Web Portal (Web Application)
- Backend Developer
- Frontend Developer
- 2022

- HTML
- CSS
- JavaScript
- PHP
- SQL

I was in charge of creating CRUD functionalities for the admin side of a project aimed at streamlining the online submission of educational assistance requirements and document management for the Municipality of Alitagtag. I also had minimal involvement in frontend development.
